Introduction

Introduction

1.1 Purpose and Related UBC Policies

The Interior Signage Guidelines document provides mandatory standards and guidelines for the creation, installation, and repair of permanent interior signage in academic and institutional (including student residence) areas of the UBC campuses. The Guidelines are intended to ensure a consistent signage system that reflects and conforms to UBC's visual identity. The individual signage elements, strategically arranged, are key to an effective wayfinding system.

Guidance on appropriate building signage in the Point Grey campus University Neighborhoods is provided in the relevant Neighbourhood Plan documents.

Additional Information Sources for UBC Signage

Brand Identity:

Consult <http://brand.ubc.ca/guidelines/visual-identity/> and UBC Brand Identity Policy GA7
https://universitycounsel-2015.sites.olt.ubc.ca/files/2019/08/Visual-Identity-Policy_GA7.pdf?file=2011/10/policy94.pdf

Non-permanent Signage:

Consult UBC Signage Policy UP8.
https://universitycounsel-2015.sites.olt.ubc.ca/files/2019/08/Signage-Policy_UP8.pdf

Naming Policy:

Consult UBC Naming Policy GA6

Introduction

1.3 Amendments to the Interior Signage Guidelines

Amendments

As sign types are amended or added to, this document will be updated. A list of amendments will be included at the front of the manual, and amended pages will be issued to holders of the manual to allow them to keep up to date.

Please refer to the front of the Interior Signage Guidelines for a complete list of changes.

2.0

Signage Principles and Procedures

UBC Vancouver Campus and UBC Okanagan Campus

Adherence to these Interior Signage Guidelines and specifications is mandatory for all those wishing to erect new signs on the UBC campuses. Requests to use alternative materials to those specified for any signage type must be submitted to and approved by UBC prior to fabrication and installation. Utilization of painted acrylic, and affixing signs using alternative tape products and/or silicon is prohibited.

Where typical N6a signage type is included in a signage package, a sample must be submitted to UBC and approval obtained prior to fabrication and installation.

Submit N6a signage type samples or alternative materials requests to:

UBC Vancouver Campus

Building Operations New Building Transition Team Architect

Signage Principles and Procedures

2.2 Signage in New Construction, Renewals or Major Renovations

These Interior Signage Guidelines provide descriptions, intent, construction and installation specifications for a range of signage types. The requirement, quantity and arrangement of these signage elements in any particular building will depend on the specifics of the building and the activities therein. For new construction, renewal, and major renovation projects that significantly alter the existing signage and wayfinding, the project is responsible for supply and installation of all room identification signage and wayfinding signage to facilitate use of the building.

It is the Project Manager's responsibility to engage an appropriate consultant to develop a comprehensive signage package with the input of the project's Working Committee or relevant user group, and UBC Facilities Planning.

Refer also to 2.1 Creation of New Signs

Building occupants or administrators may wish to replace or modify existing interior signs to reflect changes in use or occupancy. In these circumstances, the unit initiating the change is responsible for funding the supply and installation of the signage.

Replacement or modification of existing interior signage requires formal approval, as follows:

UBC Vancouver Campus

Submit a Service Request to the relevant Building Operations Zone Facility Manager. The Facility Manager will consult with Facilities Planning, and approve or request revisions to the proposed signage change. Once the request is approved, the Facility Manager will notify the requestor and relevant Building Operations personnel. Refer also to 2.1 Creation of New Signs

Existing signs that have been damaged must be repaired or replaced in accordance with 4.0 Interior Signage specifications. Contact the relevant Building Operations Zone Facility Manager.

UBC Okanagan Campus

Submit requests to alter or repair interior building signage to Facilities Planning for review and approval prior to implementation.

This section refers to any special signage specific to a building, for example Donor Walls.

New Construction, Renewals or Major Renovations

Special signage will be developed as part of the comprehensive signage package for the project. Development of Donor Walls must be based on consultation with UBC Development and Alumni Engagement.

Contact:

info@support.ubc.ca

invest.okanagan@ubc.ca

Existing Buildings

To install special signage in existing buildings, contact the following:

UBC Vancouver Campus

Contact the relevant Building Operations Zone Facility Manager.

<https://www3.buildingoperations.ubc.ca/facility-manager-search/>

UBC Okanagan Campus

Contact Facilities Planning.

To initiate discussions on Donor Walls, contact the UBC Okanagan Development Office:

Accessibility Standards

The goal for all wayfinding systems is to be universal in their usefulness. Wayfinding systems should be legible, readable and understandable to as wide a range of users as possible—including wayfinders with various physical disabilities. This can be achieved in part by keeping signs simple and intuitive, by using non-text cues to advantage, by ensuring signs use high contrast graphics to assist persons with low vision, and that signs are located where persons in wheelchairs can easily read them from a distance.

While it is ideal to maintain one universal system, UBC's complex and diverse campus poses specific accessibility challenges for persons with disabilities. There is a need for supplemental signage specifically to assist the disabled user. These access signs form part of the wayfinding system but are customized and applied to suit the specific accessibility needs.

Access signage must meet the requirements of British Columbia Building Code 2018 Part 3.8.3, as well as the Building Access Handbook 2014 Illustrated Commentary on Access Requirements in the 2012 BCBC (refer to updated Access Handbook when issued).

All Braille applied to tactile signage will conform to the following standards:

- Grade 2 Braille font to display room number
- The inscribed Braille strip shall be 25 mm (1") high and may vary in width as required.
- Each Braille field should consistently be vertically centred and located no further than 19 mm (3/4") from the left margin.

Please note that the white font for Braille is for visual representation of the location only.

For further information on Braille, visit:

http://www.brailleliteracycanada.ca/CMFiles/Accessible_Signage_Guidelines_BLC-PrintFormatted.pdf

All tactile letters and pictograms should conform to the following standards:

- Raised minimum 1 mm (1/32") and maximum 1.5 mm (3/72")
- Gently rounded edges
- Height between 16 mm (5/8") and 50 mm (2")
- Raised characters should not be near raised sign borders as this may cause confusion.
- Scribing around the letters.
- Text stroke thickness 2 mm (3/32") to 7 mm (9/32").

3.0

Graphic Elements

Graphic Elements

3.1 UBC Brand

Communicating across UBC's diverse media channels requires both a sound communications strategy and an integrated visual identity program. In order to deliver a consistent user experience through UBC's many signage touch points, all consultants are asked to familiarize themselves with the UBC Brand by visiting <http://brand.ubc.ca/>

The UBC Visual Identity System standards can be viewed at: <http://brand.ubc.ca/brand-toolkit/visual-identity/>

UBC Logo

Use of the UBC Logo on all signs shall adhere to the UBC Visual Identity System prepared by UBC Communication and Marketing. Only versions of the UBC Signature and UBC Logo available for download from <http://brand.ubc.ca/brand-toolkit/templates-and-assets/logos-signatures-and-visual-identity-assets/> are to be used.

The UBC Logo, its placement, size and other specifications are defined specifically for each sign.

UBC Logo

UBC Blue and white positive and reverse versions only, as shown.

The Hoefler & Co. font “Whitney” is used in all UBC Brand Signatures and signage. All current UBC Brand Signatures can be downloaded at:

<http://brand.ubc.ca/brand-toolkit/templates-and-assets/logos-signatures-and-visual-identity-assets/>

Whitney Semibold will be used for all interior wayfinding signage.

Whitney Semibold

abcdefghijklmnopqrstuvwxyz
 ABCDEFGHIJKLMNOPQRSTUVWXYZ
 1234567890 !@£\$%^&*()_+?

The key criterion for selection of the sign colours is to achieve a high level of contrast between the foreground graphics (text and symbols) and the background field. Achieving a high level of contrast maximizes both the visibility and readability of signs. The BC Building Code recommends a colour contrast between 85% and 95% between the colour of the graphics and the background. Given that the highest level of contrast are signs with white graphics against a dark background, UBC blue (or similar) or black are the colour combinations that are recommended.

Other colour combinations are possible, but they must provide a high level of contrast. It is recommended that white graphics are used with dark background colours. Alternative colour combinations must be approved by the Building Operations New Building Transition Team Architect.

Graphic Elements

3.3 Icons and Arrows

A consistent set of icons and arrows are used across all signage.

When a new sign design is created icons should be selected from the palette below. If you require an icon that is not shown here, please contact UBC Brand and Marketing.

With the exception of some vehicular signage, UBC signs should use the specified style of arrows. The arrows are used at fixed angles of 45° shown below.

Note the 45° angle chamfer on the bottom right-hand corner which is 10% of the measured width of the sign.

Interior Signage

Signs are given a sign code based on the following classification system. Each installed sign will have a unique number attached to its sign code. For Interior signs, the sign code includes the building code.

Lower case letters (e.g., N2a) refer to sub-types.

This number will be associated with specification drawings and can also be attached to the sign itself to aid in identification.

Map and Directory Signage

N2a

Building Map/ Directory Pylon

Definition and Intent

Building Map/Directory Pylons are double-sided, floor-mounted, modular convex signs that can exhibit orientation maps, directory inserts, directional and other information.

These are based on Vista System V400 Double-Sided Pylon (Slim Design)

Sign Content

Text for vinyl insert directory shall be limited to faculties, departments, other tenants, and building facilities and their floor/room number. This sign is not intended for listing individual personnel. Vinyl map inserts show the floor layouts of the building and the locations of principal departments and facilities.

Design Specification

Depicted:
600 mm x 1827 mm (24" x 72")
**Numerous variations available.*

Materials

- Aluminum frame, various panel substrates
- Lexan lenses (placed over vinyl inserts)

Typefaces:

For headers: Whitney Semibold.

Colour

- Approved sign system colour
- Vinyl characters: White
- Arrows: White

Mounting

Floor-mounted steel base.

Locations

Signs to be located in entrance areas or lobbies of major buildings.

N2a

Building Map/ Directory Pylon (Directional Information and Events Panel)

Directional Information

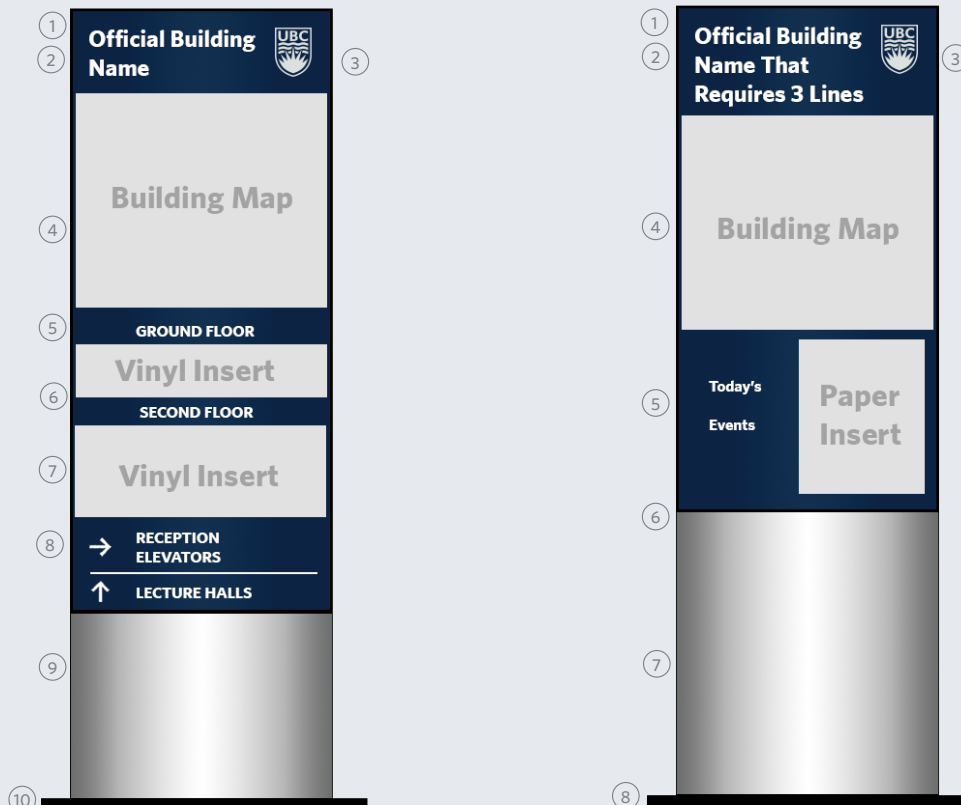

1. Building Name Panel:
600 mm (24") x 150 mm (6")
Coloured vinyl graphic on aluminum substrate
2. Letter Height: 38 mm (1.5")
3. Logo Height: 68 mm (2.5")
(min. 25 mm (1") margin to sign edge and between logo and text)
4. Map Insert: 600 mm (24") x variable height (covered with 0.25 mm (0.01") thick clear, non-glare Lexan lens - removable by suction tool)
5. Floor Title: Printed in white on sign
6. Divider: 6 mm thick white rule between each divider
7. Directory Inserts:
600 mm (24") x variable height (covered with 0.25 mm (0.01") thick clear, non glare Lexan lens)
8. Optional Directional Panel:
600 mm (24") x variable height
Coloured vinyl graphic on aluminum substrate
 - Letter Height: 25 mm (1")
 - Arrow Height: 50 mm (2")
 - Line Spacing: 25 mm (1")
 - Line Separator: 2 mm (1/16") thick white rule
9. Base Panel:
600 mm (24") x variable height
1 mm (1/32") thick brushed aluminum finish
10. Black Steel Base:
Floor-mounted with screws

Events Panel

1. Building Name Panel:
600 mm x 250 mm (24" x 10")
Coloured vinyl graphic on aluminum substrate;
2. Letter Height: 38 mm (1.5");
3. Logo Height: 68 mm (2.5");
(min. 25 mm (1") margin to sign edge and between logo and text);
4. Events Panel & Panel Insert:
600 mm x 305 mm (24" x 12");
Coloured vinyl graphic on aluminum substrate;
5. Letter Height: 25 mm (1") line spacing 50 mm (2") (insert panel covered with 0.25 mm (0.01") thick clear, non-glare Lexan lens - removable by suction tool);
6. Divider: 6 mm thick space (3/16");
7. Base Panel:
600 mm (24") x variable height
1 mm (0.03") thick brushed aluminum finish;
8. Black Steel Base:
Floor-mounted with screws.

Panel Insert Variation:

- Directional information can be added
- An events panel can be used that allows for daily updating

N2b

Building Map/ Directory Pylon (Small Version)

Definition and Intent

Building Map/Directory Pylons are double-sided, floor-mounted or free-standing, modular convex signs that can exhibit orientation maps, directory inserts, directional and other information.

These are based on Vista System V600 Double-Sided Pylon (Slim Design).

Content for maps and directories follow Sign Content for N2a.

Design Specification

Depicted
400 mm x 1522 mm (16" x 60")

**Numerous variations available.*

***Example shows 2-panel components*

Materials

- Aluminum frame, various panel substrates
- Lexan lenses over vinyl inserts

Typefaces

For headers: Whitney Semibold.

Colour

- Approved sign system colour
- White vinyl characters

Mounting

Floor-mounted steel base.

Locations

Signs to be located in entrance areas or lobbies of minor buildings.

Panel Insert Variations

- Directional Information can be added
- Directory Insert can be added

N2c

Wall Mounted Building Directory Map

Definition and Intent

Wall-mounted Building Directory Maps are intended for use in lobbies and entrances of buildings. They exhibit a combined orientation map and directory for the building.

Content to be developed in accordance with the Signage Principles and Procedures.

Content for maps and directories follow Sign Content for N2a.

Design Specification

Size dependent on the predetermined size and orientation of maps provided.

Borders: will remain the same height/width as mentioned regardless of map size or orientation.

Materials

- Black Sintra® 3mm (1/8") backing
- White vinyl characters
- Map (Digital graphics using Roland colour system)
- Matte finish laminate

Typefaces

For headers: Whitney Semibold
Letter height: 44.4 mm (1.75")

Colours

- Approved sign system colour
- White vinyl characters

Mounting

- Tape with 12 mm (1/2") 3M Scotch® brand #4032 foam tape as per N6a mounting instructions

Locations

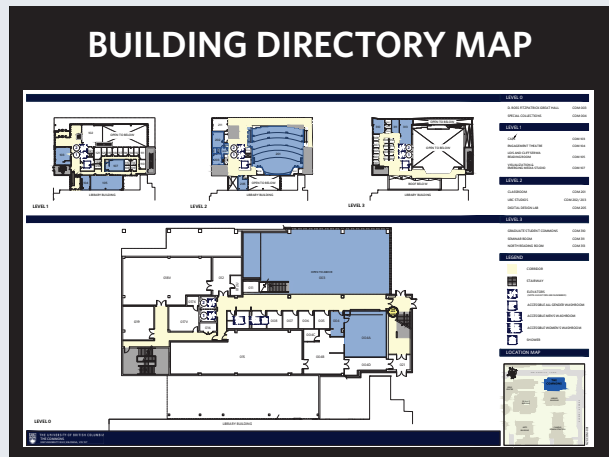

Signs to be located in highly visible area of lobbies or main entrances to a building

Position

Centre line 1350 mm (53") above finished floor

127 mm
5"

BUILDING DIRECTORY MAP

127 mm
5"

N2d

Building Map/ Directory Exterior Pylon

Definition and Intent

Building map/directory exterior pylons are double-sided, floor-mounted, modular convex signs that can exhibit orientation maps, directory inserts, directional and other information.

These are based on Vista System V600 Double-Sided Pylon (Slim Design)

Content for maps and directories follow Sign Content for N2a.

Design Specification

Numerous variations available.

Materials

- Aluminum frame, aluminum substrate
- Laminated exterior-grade vinyl graphics glued to aluminum substrate

Typefaces:

For headers: Whitney Semibold.

Colour

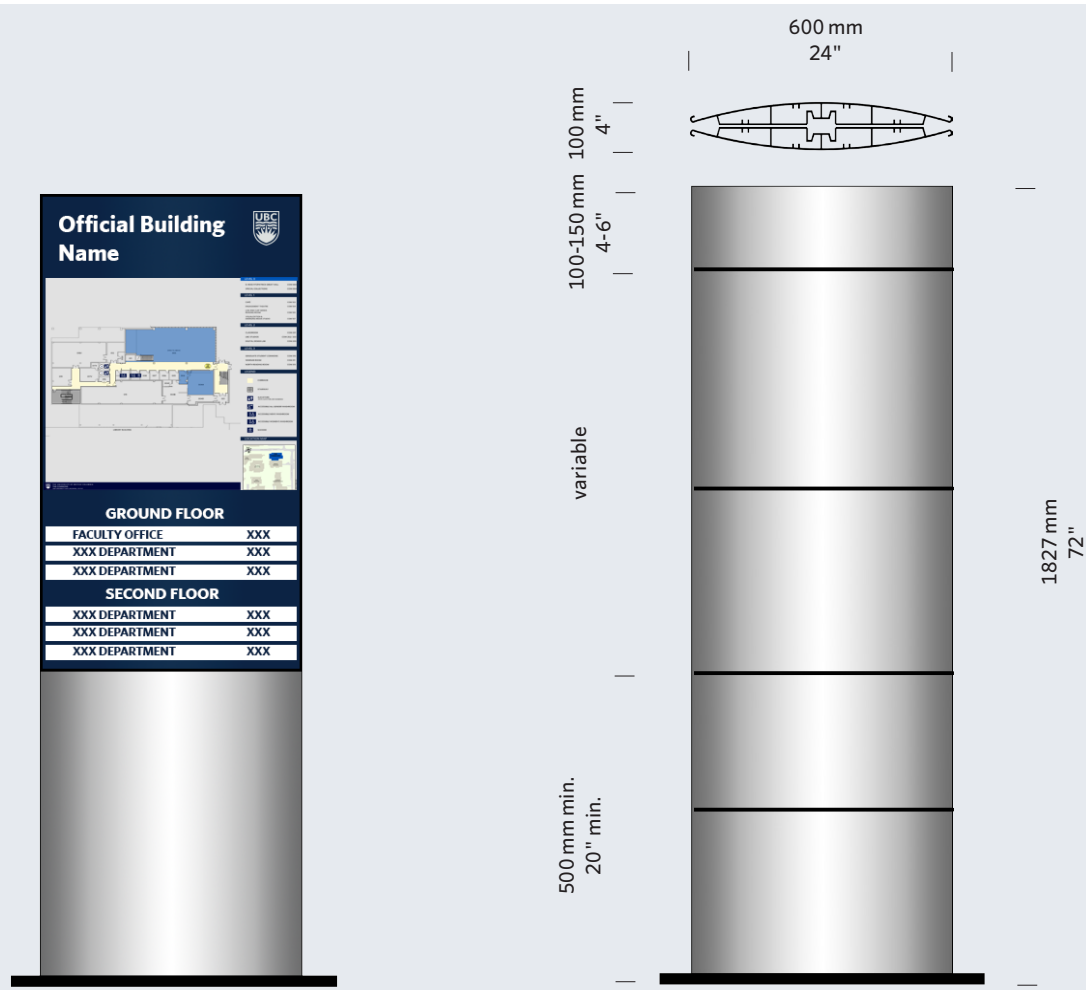

- Approved sign system colour
- Vinyl characters: White

Mounting

Floor-mounted steel base.

Locations

Signs to be located in covered exterior area near building entrances.

N2e

Building/ Floor Directory

Definition and Intent

Building directories list building tenants and their locations within the building. Type N2e is intended for use in entrance areas or lobbies of minor buildings where there is available wall space. This sign type may also be used as a floor directory. It is a modular sign with a paper insert.

Content for maps and directories follow Sign Content for N2a.

Design Specification

Materials

- Faceplate: Clear non-glare matte finish acrylic 1.6 mm (1/16"). Matte side out
- Backing plate: Black Sintra® 3 mm (1/8")
- Spacer strips: 12 mm (1/2") double-sided 3M Scotch® Brand foam tape #4032
- Digitally printed header black with white character
- Black vinyl footer
- Paper insert: 280 mm x 430 mm (11" x 17")

Typefaces

For headers: Whitney Semibold
Letter height: 25 mm (1")

Mounting

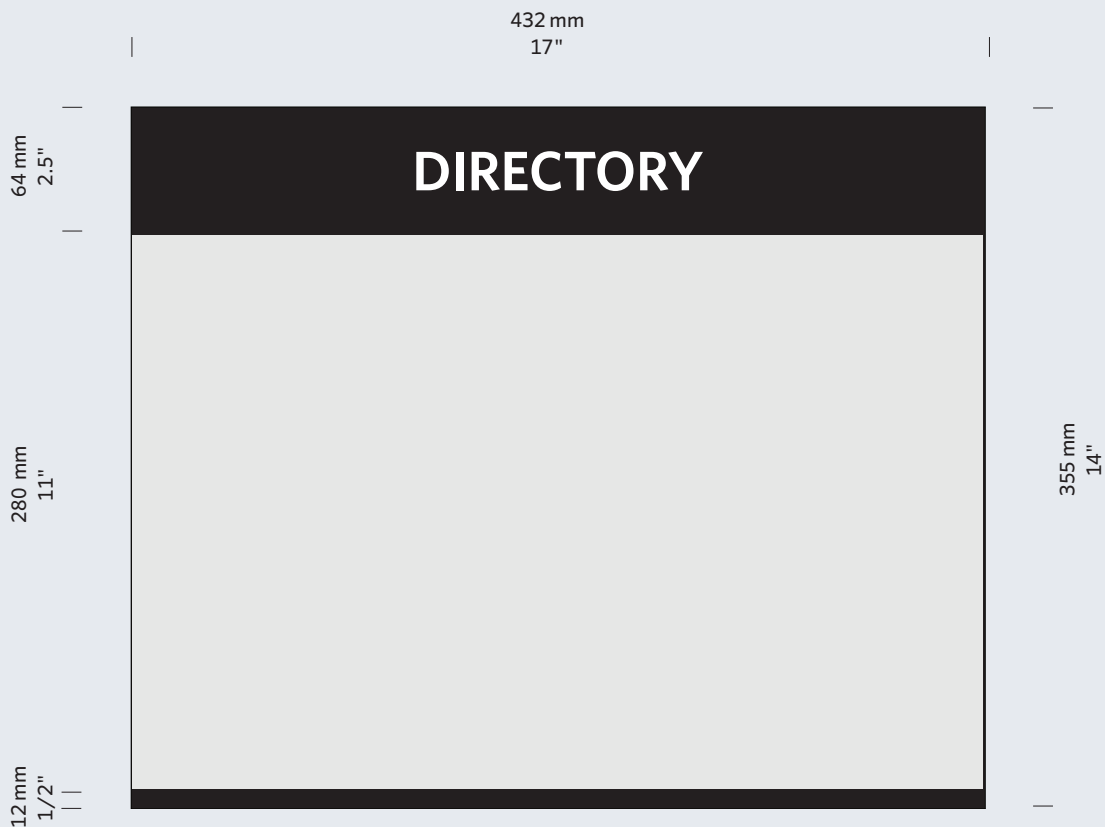

Wall-mounted as per N6a Room Identification Sign mounting detail instructions.

Locations

Signs to be located in highly visible areas or in elevator lobbies.

Position

Centre line 1350 mm (53") above finished floor.

Display Case

Definition and Intent

Building Map/Directory cases are wall-mounted steel cases with glass doors. Cases can contain building directories and maps.

Content to be developed in accordance with the Wayfinding Principles and Procedures.

Content for maps and directories follow Sign Content for N2a.

Design Specification

Materials

Steel frame case with hinged or sliding glass doors.

Mounting

Wall-mounted with screws

Location

Signs to be located wherever N2e directory sign is not suitable.

N3a

Orientation Map: Building Floor

Definition and Intent

Orientation maps graphically display and identify floor areas in map form to assist wayfinding. Type N3a is intended for use on individual floors where there is available wall space. This sign type may also help to orient visitors at main vertical circulation points to each floor, at high traffic, visible locations, and at junctions of wings/corridors in complex buildings.

Content for maps and directories follow Sign Content for N2a.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") backing
- Bright White vinyl characters
- Map (Digital graphics using Roland colour system)
- Matte finish laminate

Typefaces

For headers: Whitney Semibold
Letter height: 25 mm (1")

Mounting

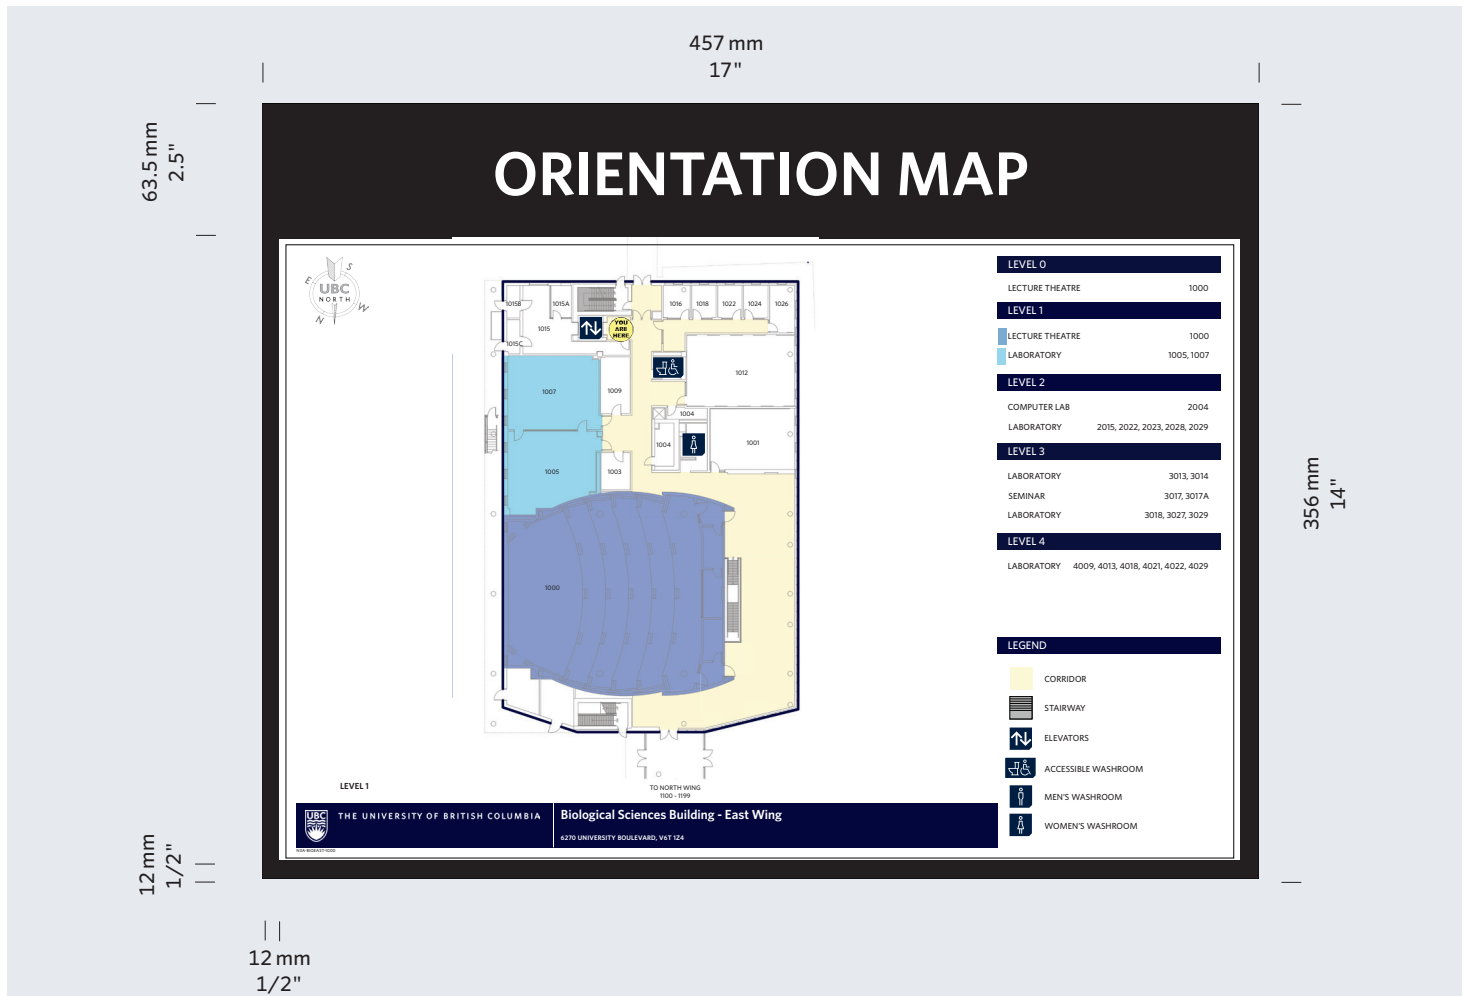

Wall-mounted as per N6a Room Identification Sign mounting detail

Location

Signs to be located at entrances to buildings or building levels, at main vertical circulation point to each floor and intersections of wings/ corridors in complex buildings.

Position

Centre line 1350 mm (53") above finished floor.

Directional Signage

N4a

Small Directional Sign

Definition and Intent

These wall-mounted signs provide direction to departments and offices.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") backing
- Bright White vinyl characters

Typefaces

- Letter type: Whitney Semibold
- Letter height: 25 mm (1") - 38 mm (1.5")

Layout

1. 34 mm (1.3") left or up arrow always in top section of sign;
2. 90 ° corners;
3. 25 mm (1") space between arrows and text;
4. 25 mm (1") space between numbers and text;
5. 19 mm (3/4") between lines;
6. 1.6 mm (1/16") white line to separate direction groups;
7. 34 mm (1.3") right or down arrow always starts right at first line content;
8. Align text as illustrated;
9. 25 mm (1") space between arrows and edge of sign;
10. 12 mm (1/2") between two-line names.

Mounting

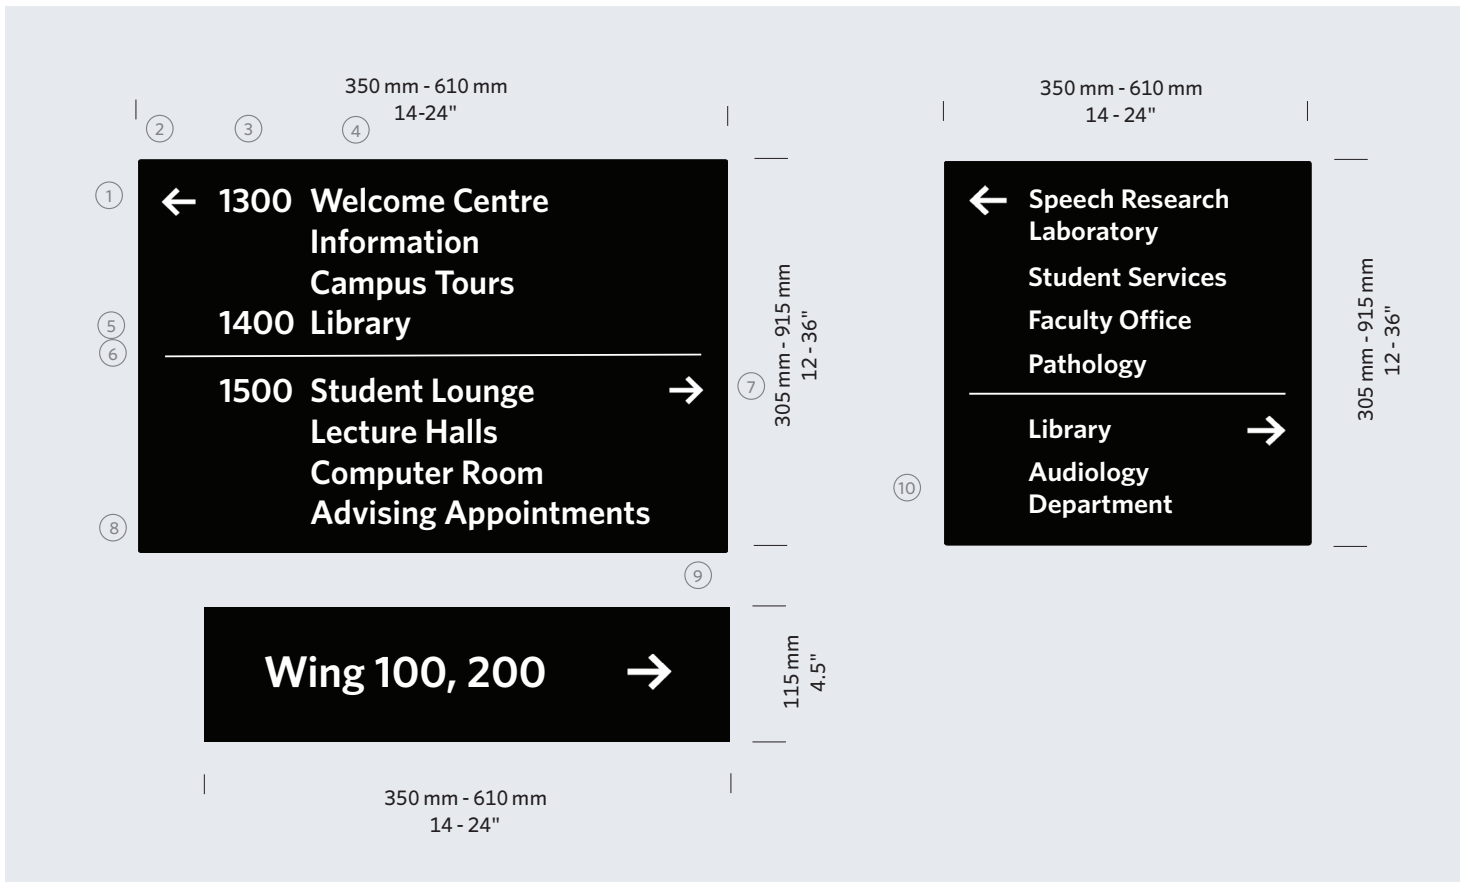

- Wall-mounted as per N6a mounting instructions

Locations

Signs to be located at decision-making points, e.g., intersections of corridors.

Position

- Mounted: Centre line 1350 mm (53") above finished floor.

N4b

Wall - Mounted or Suspended Directional Wing/ Block Sign

Definition and Intent

These overhead signs are to provide direction to major wings, annexes or blocks in complex buildings.

Design Specification

Materials

- Suspended: Black Sintra® 6 mm (0.25")
- Mounted: Black Sintra® 3 mm (1/8")
- Bright White vinyl characters (double-sided where required)

Typefaces

- Letter type: Whitney Semibold
- Letter height: 50 mm (2")

Layout

1. 90 ° corners;
2. Centre text vertically and horizontally;
3. 50 mm (2") left or right arrow placed accordingly;
4. 150 mm (6") from edge to cable;
5. 50 mm (2") left or up arrow always in top section of sign;
6. 1.6 mm (1/16") thick white rule to separate direction groups;
7. 50 mm (2") right or down arrow always starts right at first line of content;
8. Align text as illustrated;
9. 50 mm (2") between text and edge of sign .

Mounting

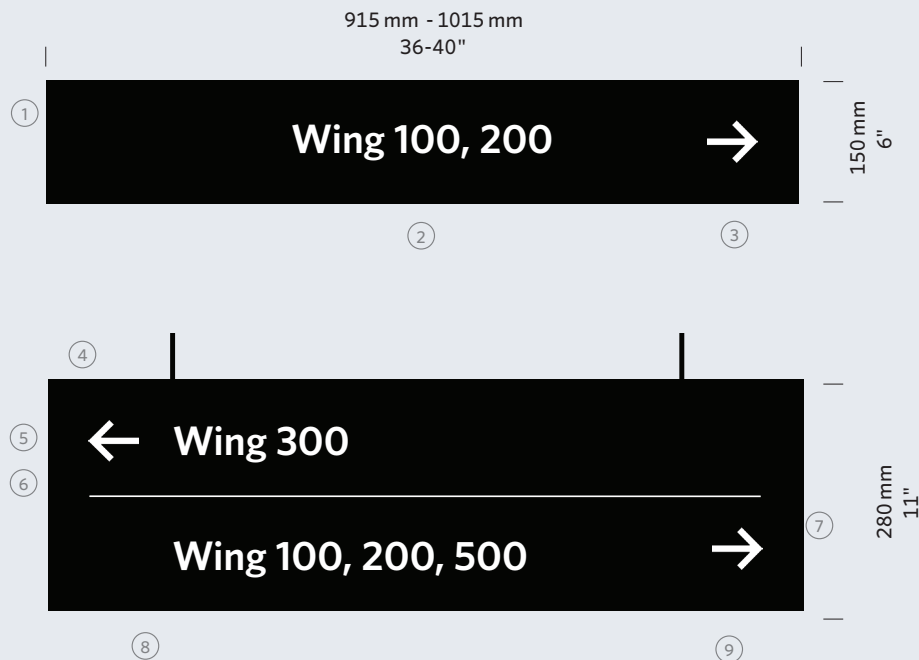

- Wall-mounted: as per N6a mounting instructions
- Suspended: using appropriate anchors with aircraft cable

Locations

Signs to be located at decision-making points, e.g., intersections of major wings, blocks or corridors.

Position

- Mounted: Centre line 1350 mm (53") above finished floor.
- Suspended: Bottom of sign 2133 mm min. (84" min.) - 3048 mm max.(120" max.) to centered to finish floor.

N4c

Large Wall-Mounted or Suspended Directional Sign

Definition and Intent

These provide direction to groups of rooms, department and faculty main offices only. They can be suspended overhead or wall-mounted at high level.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") backing
- Bright White vinyl characters

Typefaces

- Letter type: Whitney Semibold
- Letter height:
25 mm (1") - 38 mm (1.5")

Layout

1. 150 mm (6") from edge of sign to cable;
2. 90 ° corners;
3. 50 mm (2") left or up arrows always in top section of page;
4. 16 mm (0.6") space between two-line text;
5. 6 mm (1/4") thick white rule line to separate direction groups;
6. 25 mm (1") space between lines;
7. 50 mm (2") right or down arrow always starts right at first line of content;
8. Align text as illustrated;
9. 50 mm (2") space between text and arrows;
10. 50 mm (2") space between arrows and edge of sign.

Mounting

- Suspended: using appropriate anchors with aircraft cable.
- Wall-mounted: as per N6a mounting instructions.

Locations

Signs to be located at decision-making points, e.g., intersections of corridors. When wall mounted, mount at high elevation

Position

Bottom of sign
2133 mm min. - 3048 mm max.
(84" min. - 120" max.) to centered to finish floor.

N4d

Perpendicular Elevator Sign

Definition and Intent

These perpendicular-mounted signs provide advance notification of elevators. They are designed to be viewed from a distance, typically down a corridor where elevator doors cannot be seen.

This sign must be provided at all elevator locations where elevator doors cannot be seen from a distance.

This bracket is used for all internal Perpendicular signage.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") matte finish, double-sided
- Bright White vinyl graphics
- 12 mm (1/2") double-sided 3M Scotch® Brand Foam tape #4032

Layout

- White vinyl graphics centered on 8"x10" portion of signage

Mounting

1. Foam tape along folded edge;
2. 90 ° heat bend

Locations

Signs to be located at all elevator locations where door-mounted elevator signs cannot be seen from a distance.

Position

Bottom of sign 2133 mm (84") to finish floor.

N4e

Perpendicular Washroom Sign

Definition and Intent

These perpendicular-mounted signs provide advance notification of washroom facilities. They are designed to be viewed from a distance, typically down a corridor where door-mounted washroom signs cannot be seen.

This sign must be provided at all washrooms locations where door-mounted washroom signs cannot be seen from a distance.

Use approved symbols in Section 4.7 Washroom Signage for other genders.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") matte finish, double-sided
- Bright White vinyl graphics
- 12 mm (1/2") double-sided 3M Scotch® Brand Foam tape #4032

Layout

- White vinyl graphics centered on 8"x 10" portion of signage

Mounting

1. Foam tape along folded edge;
2. 90 ° heat bend

Locations

Signs to be located at all washroom locations where door-mounted washroom signs cannot be seen from a distance.

Position

Bottom of sign 2133 mm (84") to finish floor.

N4f

Symbol Only Accessible Route

Definition and Intent

To direct the user to accessible routes and destinations. Required especially at junctions of different routes and at inaccessible barriers.

An Accessible Route sign shall be provided where a specific accessible circulation path is defined.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") matte finish, double-sided
- Bright White vinyl graphics and characters

Layout

White vinyl graphics centered on 200 mm x 254 mm (8" x 10") sign face

Mounting

Wall-mounted as per N6a Room Identification Sign mounting detail

Locations

Signs to be located on walls at hallway junctions along accessible routes.

Position

Centre line 1350 mm (53") above finished floor.

N4g

Symbol and Text Accessible Route

Definition and Intent

To direct the user to accessible routes and destinations. Required especially at junctions of different routes and at inaccessible barriers.

An Accessible Route sign shall be provided where a specific accessible circulation path is defined.

Design Specification

Materials

- Black Sintra® 3 mm (1/8") matte finish, double-sided
- Bright White vinyl graphics and characters

Typefaces

Letter type: Whitney Semibold (Upper and Lower Case)

Layout

- Letter height: 19 mm (3/4")
- 12 mm (1/2") spacing between text
- White vinyl graphics centered on 200 mm x 254 mm (8" x 10") sign face

Mounting

Wall-mounted as per N6a Room Identification Sign mounting detail

Locations

Signs to be located at on walls at hallway junctions along accessible routes.

Position

Centre line 1350 mm (53") above finished floor.

Room Signage

N5a

Room Identification Sign

Definition and Intent

These wall-mounted signs identify individual rooms and department offices. An insert window permits current room occupant to add their identification. (For room signs with no insert window use N5b). The sign is intended to conform to principles of universal access.

Sign shall display the room number and room name if accessible to the public, with raised upper-case characters and the room number with Grade 2 Braille, as per the specifications that follow.

Design Specification

Materials

- Backing plate: White Sintra® 3 mm (1/8")
- Internal layer: 1.6 mm (1/16") clear, non-glare matte finish acrylic
- Faceplates: 3 separate and removable panels, 1.6 mm (1/16") matte finish Rowmark® Black ADA Alternative Substrate with chamfered edges
- Rowmark® Bright White ADA Alternative Appliqué Characters

Typefaces

- Letter type: Whitney Semibold (Upper-case only)
- Braille: Grade 2 braille

Layout

As per N5a Room Identification Sign Detail.

Mounting

As per N5a Room Identification Sign Mounting Detail.

Locations

As per N6a Room Identification Sign Mounting Detail.

Position

Centerline 1350 mm (53") above finished floor.

N5a Room Identification Sign Detail

Definition and Intent

These wall-mounted signs identify individual rooms and department offices. An insert window permits current room occupant to add their identification. The sign is intended to conform to principles of universal access.

This sign shall be displayed where room is accessible to the public.

Sign N5b is used for room signs with no insert window.

Design Specification

Layout

1. 19 mm (3/4") margin for each panel;
2. Room Number Height : 32 mm (1.25");
3. Room Name: 13 mm (3/8");
4. Grade 2 Braille (*Use clear raster or colour of substrate - white font for visual representation only*);
5. 3 mm (1/8") radius corners.

* Number, name and Braille characters vertically centered and left aligned.

Mounting

As per N5a Room Identification Sign Detail.

Locations

As per N5a Room Identification Sign Detail

Position

Centerline 1350 mm (53") above finished floor.

N5a

Room Identification Sign Mounting Detail

Definition and Intent

These wall-mounted signs identify individual rooms and department offices. An insert window permits current room occupant to add their identification. The sign is intended to conform to principles of universal access.

This sign shall be displayed where room is accessible to the public.

Sign N5b is used for room signs with no insert window.

Design Specification

Layout

1. Rowmark® Bright White ADA Alternative Appliqué Characters;
 2. Grade 2 Braille;
 3. Rowmark® Black ADA Alternative Substrate
- * All faceplate edges chamfered*
4. 19.05 mm (3/4") double-sided masking tape;

5. 1.58 mm (1/16") Non Glare Acrylic (matte side out);
6. 12.7 mm (1/2") double-sided 3M Scotch® Brand foam tape #4032;
7. 3 mm (1/8") White Sintra® Substrate;
8. 12.7 mm (1/2") double-sided 3M Scotch® Brand foam tape #4032.

Locations

As per N6a No Insert Classroom Identification Sign Mounting Detail.

Position

Centerline 1350 mm (53") above finished floor.

N6a No Insert Classroom Identification Sign Detail

Definition and Intent

These wall-mounted signs identify individual rooms which do not have changing occupants or which are not accessible to the public. The sign is intended to conform to principles of classroom specific text.

Sign shall display the room number and optionally the room name, with raised upper-case characters and the room number with Grade 2 Braille, as per the specifications that follow.

Design Specification

Layout

1. 19 mm (3/4") margin for each panel
3 mm (1/8") radius corners;
2. Room Number: 32 mm (1.25");
3. Room Name: 19 mm (3/4")
4. Top and bottom edges beveled;
5. Bottom edge beveled only;
6. Braille: as per Grade 2 Braille (*Use black raster - white font for visual representation only*);
8. 3 mm (1/8") radius corners.

** Number, name and Braille characters vertically centered and left aligned.*

Mounting

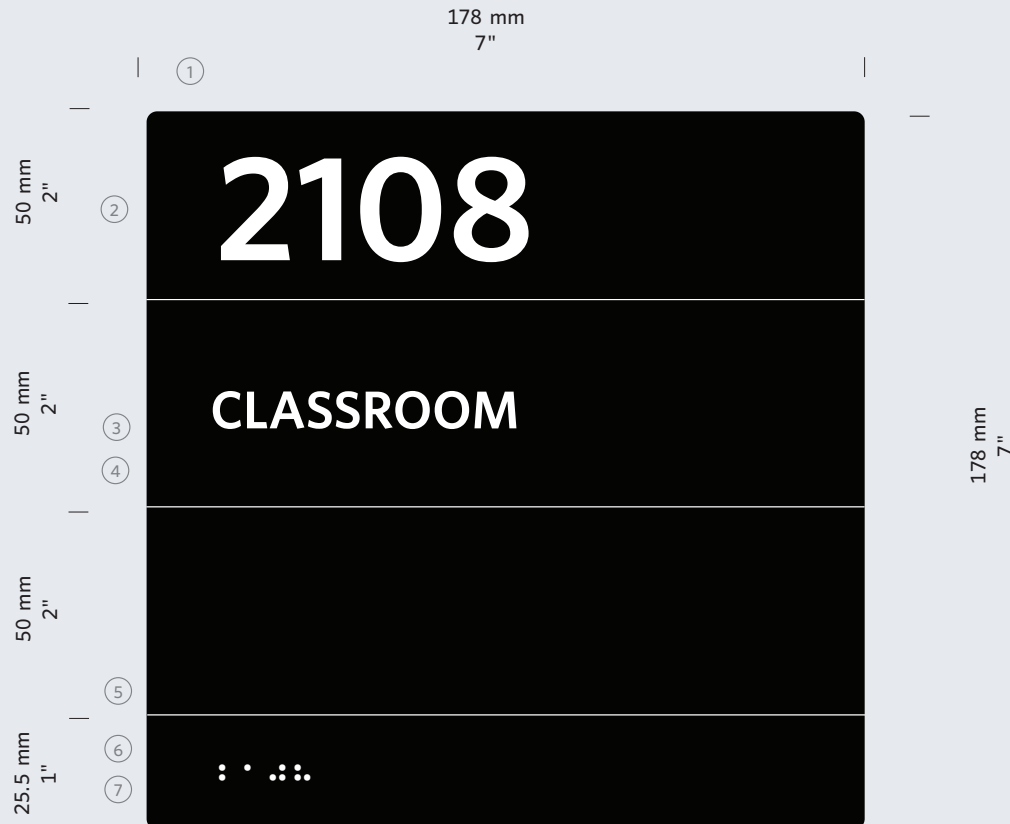

As per N6a No Insert Classroom Identification Sign Mounting Detail.

Locations

As per N6a Classroom Identification Sign Mounting Detail.

Position

Centerline 1350 mm (53") above finished floor.

N6a

No Insert Classroom Identification Sign Mounting Detail

Definition and Intent

These wall-mounted signs identify classrooms. An insert window permits current room occupant to add their identification. The sign is intended to conform to principles of classroom specific text.

This sign shall be displayed where room is accessible to the public.

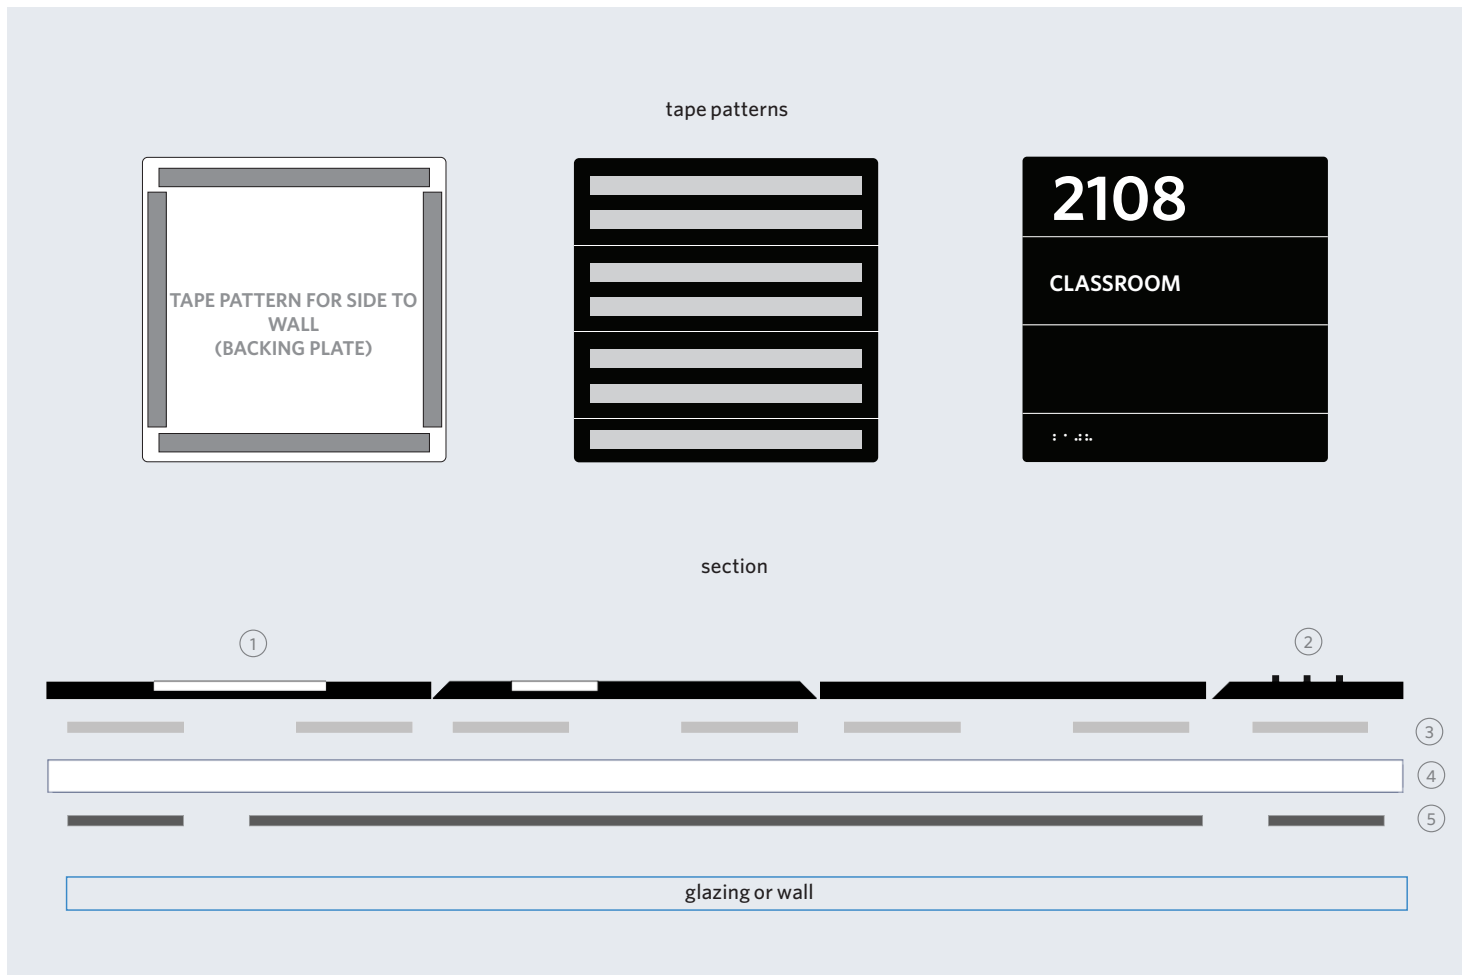

Design Specification

Layout

1. Engraved Lamacoid for all four panels;
** Note chamfered edges on select panels only*
2. Braille: as per Grade 2 Braille (Use black raster - white font for visual representation only);
3. 12.7 mm (1/2") double-sided 3M Scotch® Brand foam tape #4032;
4. 3 mm (3/32") White Sintra® Substrate;
5. 12.7 mm (1/2") double-sided 3M Scotch® Brand foam tape #4032.

Mounting

See tape patterns below.

N6a

Classroom Identification Sign Mounting Detail

Definition and Intent

These wall-mounted signs identify classrooms. The sign is intended to conform to principles of classroom specific text

This sign shall be displayed where room is accessible to the public.

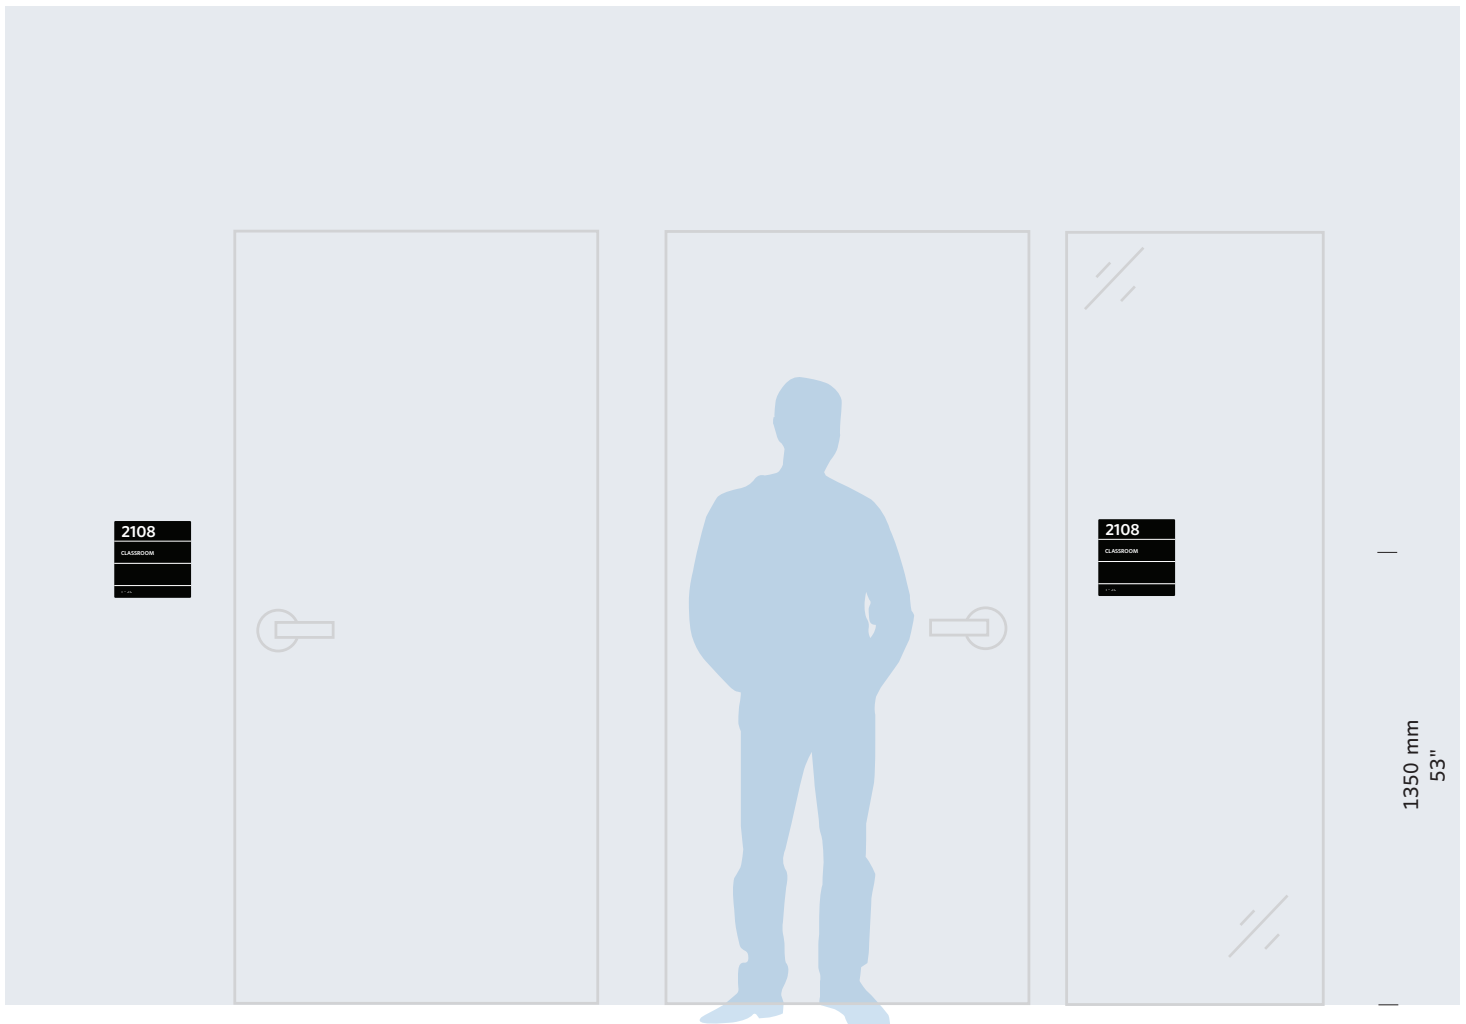

Design Specification

Locations

- On handle side of door, unless obstacles do not permit
- 50 mm (2") from glazing casing or door frame;

Position

Centerline 1350 mm (53") above finished floor.

N6b

Large Insert Classroom Identification Sign

Definition and Intent

These wall-mounted signs identify individual classrooms, and are used where occupants wish to display changing information regarding the room use or its occupants. The sign is intended to conform to principles of classroom specific text.

N7b is only used when permitted and approved by FP Learning Spaces.

Sign shall display the room number and room name, where applicable, with raised upper-case characters and the room number with Grade 2 Braille, as per the specifications that follow.

Design Specification

Materials

- Backing plate: White Sintra® 3 mm (1/8")
- Internal layer: 2 mm (1/16") clear, non-glare matte finish acrylic
- Faceplates: 3 separate and removable panels, 1.6 mm (1/16") Encore laser engravable lamacoid "Lasercore" black/ white product #552-229

Typefaces

- Letter type: Whitney Semibold (Upper-case only)
- Braille: Grade 2 braille

N6c Classroom Information (Interior) Mounting Detail

Definition and Intent

These wall-mounted signs identify individual rooms and department offices, and are used where occupants wish to display changing information regarding the room use or its occupants. The sign is intended to conform to principles of classroom specific text.

Sign shall display the room number and room name, where applicable, with raised upper-case characters and the room number with Grade 2 Braille, as per the specifications that follow.

Design Specification

Locations

- On handle side of door, inside of classroom
- 50 mm (2") from door or glazing casing;

* Dotted line indicates: N6b Large Insert Classroom Identification Sign located on the exterior of classroom.

Position

1. Glazing placement:
 - Inside classroom in line with N6a or N6b (Shown as dotted line)
2. Alternate wall placement:
 - Inside classroom centerline 1350 mm (53") above finished floor near exit door.

N6d Contact Information Sign

Definition and Intent

These wall-mounted signs provide contact information within classrooms to various UBC departments that support classroom users.

As support models may be unique, please confirm signage information details with FP Learning Spaces (learning.spaces@ubc.ca).

Design Specification

Materials

- Encore Laser Engravable Lamacoid "Lasercore" Black/White product #552-229

Typefaces

- Letter type: Whitney Semibold

Layout

1. Engraved information: 6.3 mm (1/4")

2. 1.6 mm (1/8") radius corners, no chamfered edges

Mounting

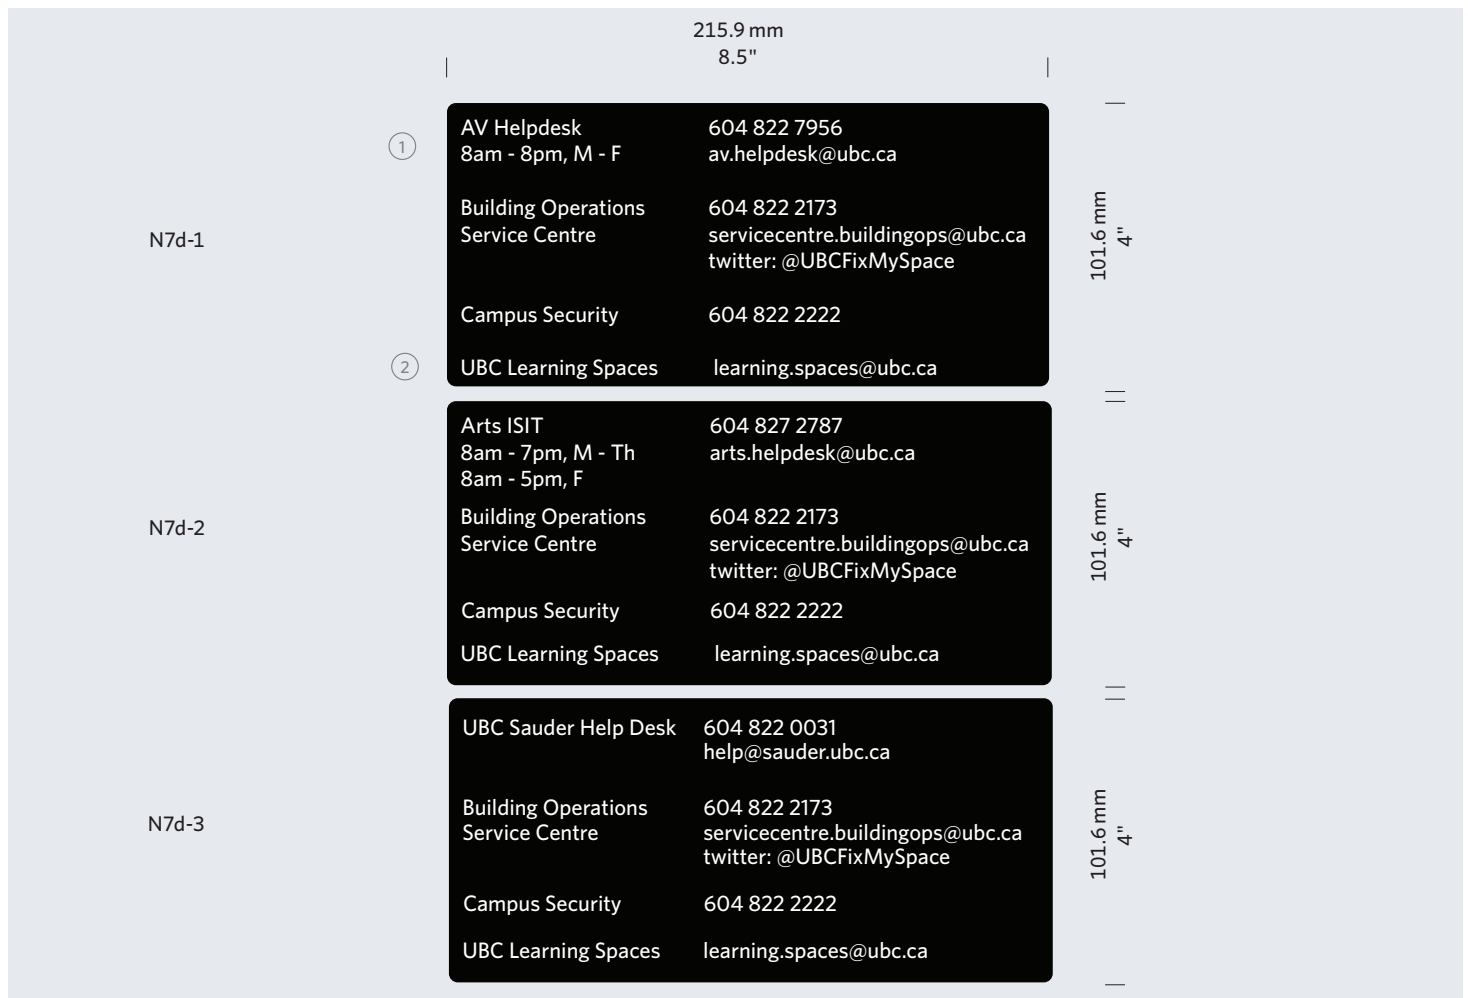

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Front of Classroom near main exit door.

Position

Centerline 1350 mm (53") above finished floor

Washroom Signage

N7a

Men's Non-Accessible Washroom Sign

Definition and Intent

These wall-mounted signs identify all men's washrooms that have no wheelchair accessibility.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Braille: Grade 2 braille

Layout

1. Raised Rowmark® Bright White ADA Alternative Appliqué graphics
2. Braille Height for "men toilet": as per Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

Door-mounted with Scapa® high tack double-sided adhesive covering entire back of sign.

Locations

Preferred placement: centered on width of door;

Alternative: 50 mm (2") - 100 mm (4") from door casing.

Position

Centre line 1350 mm (53") above finished floor.

N7b

Women's Non-Accessible Washroom Sign

Definition and Intent

These wall-mounted signs identify all women's washrooms that have no wheelchair accessibility.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Braille: Grade 2 braille

Layout

1. Raised Rowmark® Bright White ADA Alternative Appliqué graphics
2. Braille Height for "women toilet": as per Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

Door-mounted with Scapa® high tack double-sided adhesive covering entire back of sign.

Locations

Preferred placement: centered on width of door;

Alternative: 50 mm (2") - 100 mm (4") from door casing.

Position

Centre line 1350 mm (53") above finished floor.

N7c

All Gender Non-Accessible Washroom Sign

Definition and Intent

These wall-mounted signs identify all gender washrooms that have no wheelchair accessibility.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Braille: Grade 2 braille

Layout

1. Raised Rowmark® Bright White ADA Alternative Appliqué graphics
2. Braille Height for "all gender toilet": as per Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

Door-mounted with Scapa® high tack double-sided adhesive covering entire back of sign.

Locations

Preferred placement: centered on width of door;

Alternative: 50 mm (2") - 100 mm (4") from door casing.

Position

Centre line 1350 mm (53") above finished floor.

N7d

Men's Accessible Washroom Sign

Definition and Intent

These wall-mounted signs identify all men's washrooms that have wheelchair accessibility.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Braille: Grade 2 braille

Layout

1. Raised Rowmark® Bright White ADA Alternative Appliqué graphics
2. Braille Height for "men accessible toilet": as per Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

Door-mounted with Scapa® high tack double-sided adhesive covering entire back of sign.

Locations

Preferred placement: centered on width of door;

Alternative: 50 mm (2") - 100 mm (4") from door casing.

Position

Centre line 1350 mm (53") above finished floor.

N7e

Women's Accessible Washroom Sign

Definition and Intent

These wall-mounted signs identify all women's washrooms that have wheelchair accessibility.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Braille: Grade 2

Layout

1. Raised Rowmark® Bright White ADA Alternative Appliqué graphics
2. Braille Height for "women accessible toilet": as per Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

Door-mounted with Scapa® high tack double-sided adhesive covering entire back of sign.

Locations

Preferred placement: centered on width of door;

Alternative: 50 mm (2") - 100 mm (4") from door casing.

Position

Centre line 1350 mm (53") above finished floor.

N7f

All Gender Accessible Washroom Sign

Definition and Intent

These wall-mounted signs identify all gender washrooms that have wheelchair accessibility.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Braille: Grade 2

Layout

1. Raised Rowmark® Bright White ADA Alternative Appliqué graphics
2. Braille Height for "accessible toilet": as per Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

Door-mounted with Scapa® high tack double-sided adhesive covering entire back of sign.

Locations

Preferred placement: centered on width of door;

Alternative: 50 mm (2") - 100 mm (4") from door casing.

Position

Centre line 1350 mm (53") above finished floor.

Life Safety Signage

N8a

Floor Identification Sign

Definition and Intent

A sign used on landings in stairwells to identify the floor or level and to supply directional information.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Letter Type: Whitney Semibold (Uppercase only)

Layout

1. Letter Height: 19 mm (0.7") (Uppercase only)
2. Number Height: 127 mm (5") (Tactile)

Mounting

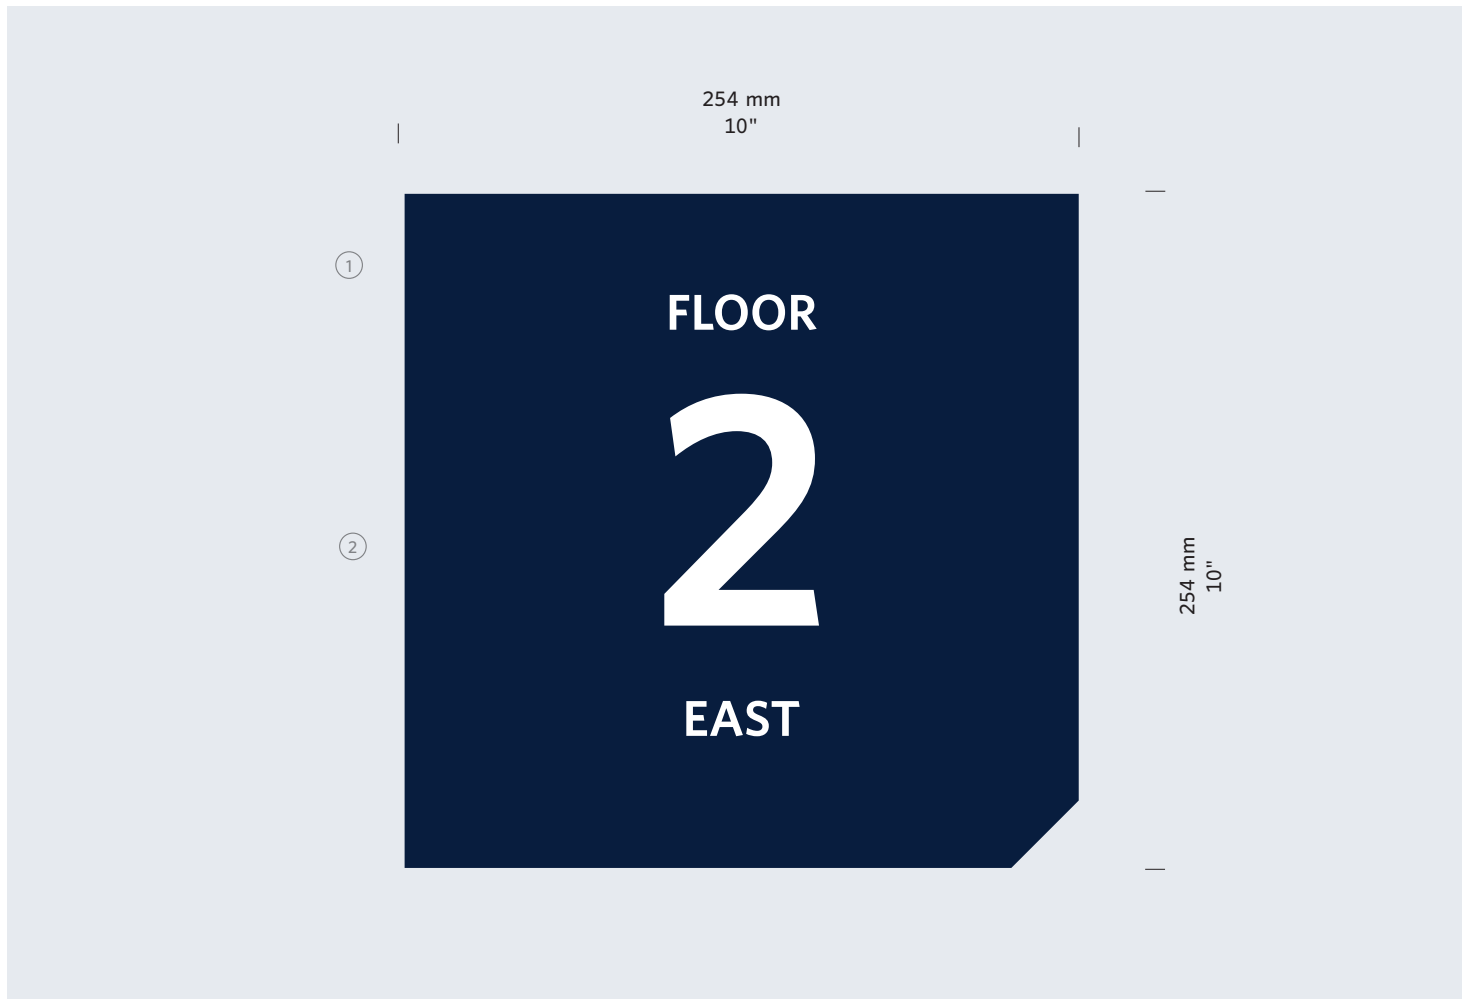

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Signs to be located on latch side of door or centre of landing.

Position

Centre line 1350 mm (53") above finished floor.

N8b

Elevator Floor Sign

Definition and Intent

This sign is to be placed on both sides of the elevator door jamb to identify the floor.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

- Letter Type: Whitney Semibold (Uppercase only)
- Braille: Grade 2 braille

Layout

1. Tactile Room Number Height: 57 mm (2.25")
2. Grade 2 Braille (*Use clear raster - white font for visual representation only*)

Mounting

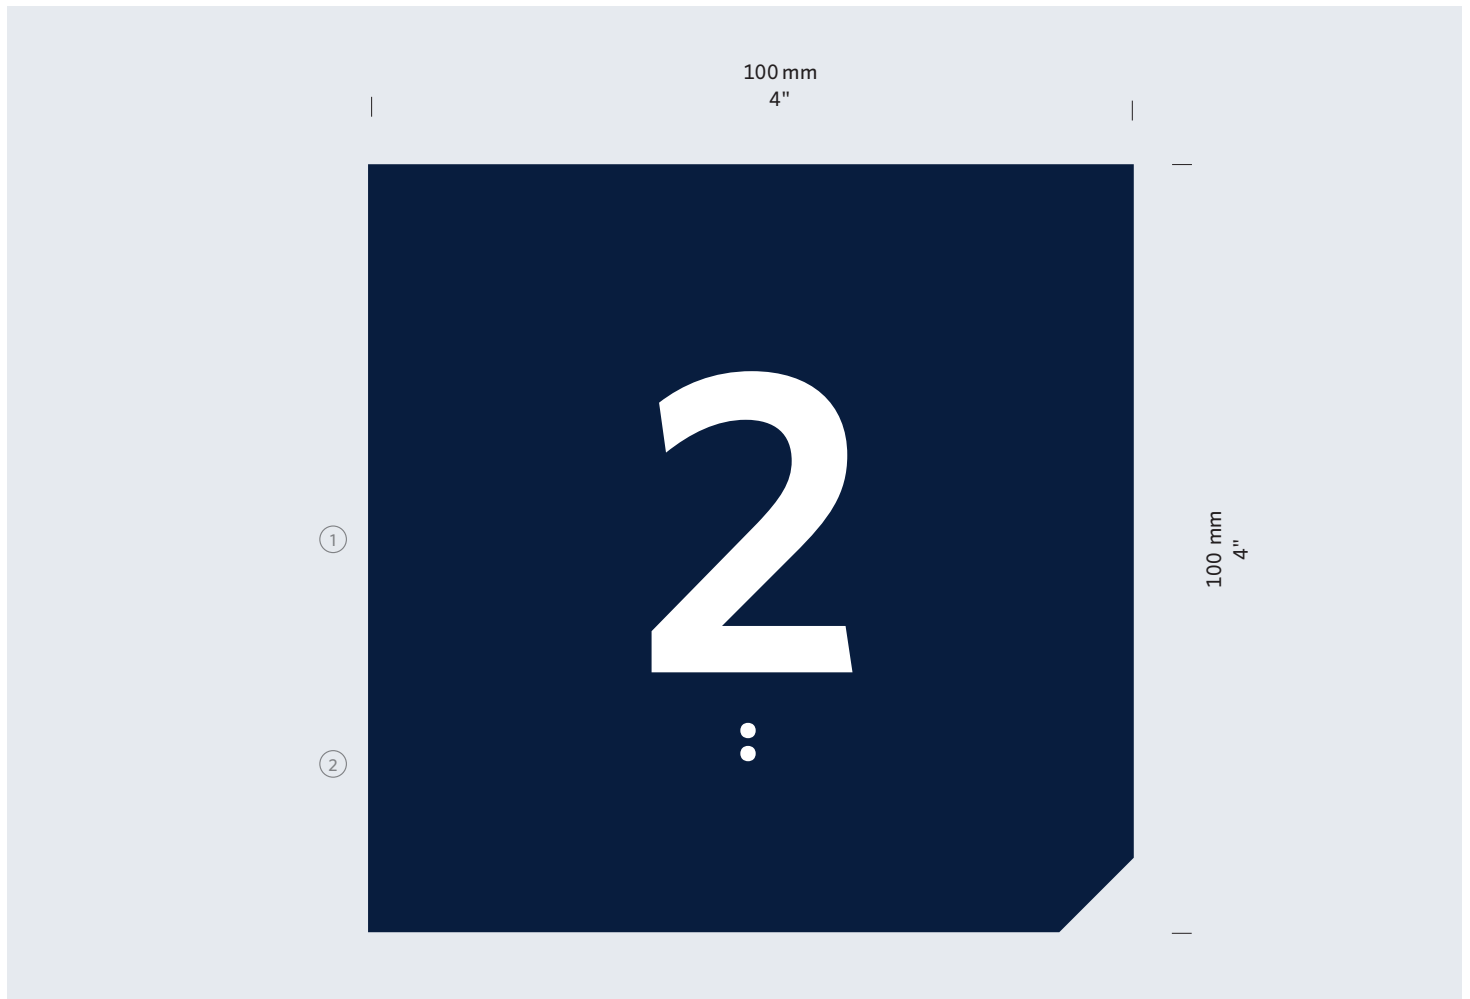

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Signs to be located on both sides of the elevator jamb.

Position

Centre line 1524 mm (60") above finished floor.

N8c

Emergency Procedures Sign

Definition and Intent

Emergency Procedures signs are located on each floor of a building. They show escape routes, muster stations and list procedures to follow for building occupants and are a requirement of the Fire Code.

An Emergency Procedures sign complete with insert shall be located in the lobby or elevator area of each building floor. Insert graphic must be reviewed by UBC Regulatory Services prior to installation.

Design Specification

Materials

- Faceplate: 1.6 mm (1/16") thick, clear non-glare matte-finished acrylic
- Backing plate: 3 mm (1/8") Black Sintra®
- Spacer strips: 0.8 mm (1/32") Rowmark® Black Alternative Appliqué

Typefaces

Letter Type: Whitney Semibold (Uppercase only)

Layout

1. Digitally printed red (Pantone 187C) and black vinyl header with white text
2. Letter Height: 19 mm (0.7")
3. 13 mm (0.5") black vinyl header and footer
4. Paper insert: Tabloid size paper

Mounting

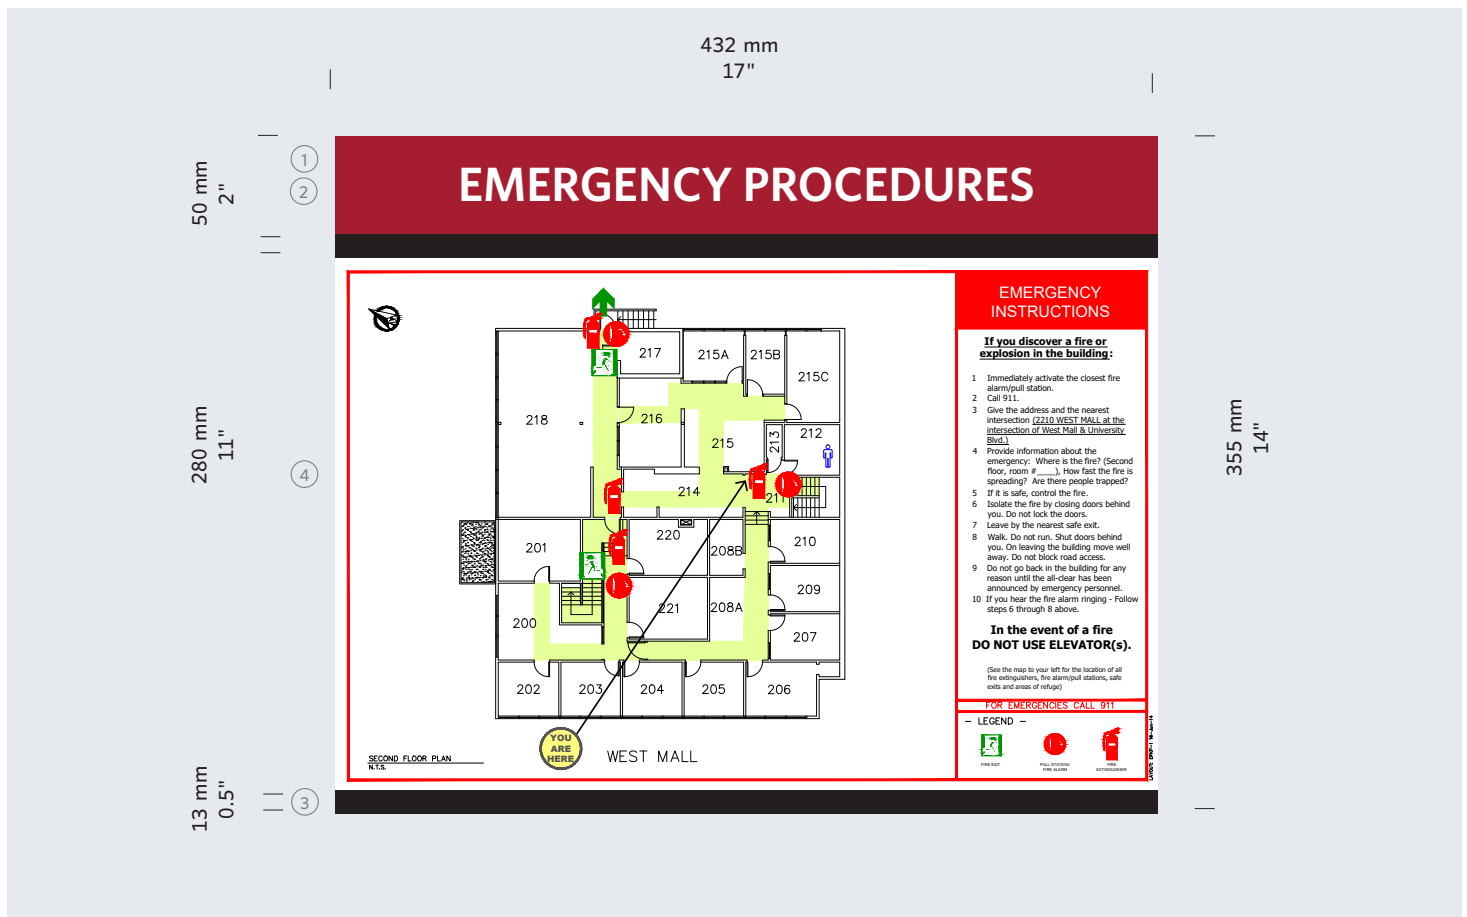

12.7 mm (1/2") double-sided 3M Scotch® Brand foam tape #4032.

Locations

Signs to be located in the lobby or elevator area of each building floor and as required.

Position

Centre line 1350 mm (53") above finished floor.

N8d

Laboratory Hazard Warning Sign

Definition and Intent

These signs inform Emergency First Responders and users about the hazards located within a room.

For rooms containing hazards, these signs shall display the room number, emergency contact names, any special information and the hazards located within the room.

Design Specification

Materials

- Sign Panel: 3 mm (1/8") White Sintra® backing
- Decals: Digital graphics using Roland colour system finished with matte laminate.

Typefaces

Letter type: Whitney Semibold

Layout

1. Symbols colour and type to match WHMIS (Workplace Hazardous Materials Information System) specifications
2. Five additional hazard labels mount flush to sign

Mounting

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Signs to be located on the door.

Position

- Centre line 1350 mm (53") above finished floor.

Stairs Sign

Definition and Intent

This sign is to help the visually impaired identify entrances to non fire-rated stairs.

This sign is to be installed at the entrance to non fire-rated stairs only. It is not to be used for fire-rated exit / egress stairs or open stairs along interior or exterior circulation routes (concourse stairs, etc.). Prior to the installation of this sign, the actual life safety classification of the stairways being identified must be verified by Project Services and/or UBC Regulatory Services.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Letter type: Whitney Semibold (Uppercase only)

Layout

1. Rowmark® ADA Bright White Appliqué
2. Letter height: 20 mm (0.8")

Mounting

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Signs to be located on the centre of the door width.

Position

Centre line 1524 mm (60") above finished floor.

N8f

Exit Stairs Sign

Definition and Intent

This sign is to help the visually impaired identify entrances to fire-rated stairs.

This sign is to be installed at the entrance to fire-rated stairs only. It is to be used for fire-rated exit/ egress stairs or open stairs along interior or exterior circulation routes (concourse stairs, etc.) leading directly to the exterior of the building. Prior to the installation of this sign, the actual life safety classification of the stairways being identified must be verified by Project Services and/or UBC Regulatory Services.

Design Specification

Materials

- 1.6 mm (1/16") Rowmark® Air Force Blue ADA alternative substrate
- Rowmark® Bright White ADA Alternative Appliqué graphics

Typefaces

Letter Type: Whitney Semibold (Uppercase only)

Layout

1. Rowmark® ADA Bright White t Appliqué
2. Letter height: 20 mm (0.8")

Mounting

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Signs to be located on the centre of the door width.

Position

Centre line 1524 mm (60") above finished floor.

N8g Exit Sign

Definition and Intent

This sign is to help the visually impaired identify entrances to exits.

This sign is to be installed at the entrance to an exit. This includes exits directly to exterior safe areas, and to fire-rated exit corridors which lead directly to exterior safe areas (e.g. entrance vestibules exiting to the exterior). Since the "Exit" sign is not directional, the sign is not intended to identify interior doorways or open corridors leading to an exit doorway (even though they may be identified by overhead "Exit" signs), or crossover floors. Prior to the installation of this sign, the actual life safety classification of the stairways being identified must be verified by Project Services and/or UBC Regulatory Services.

Design Specification

Materials

- Encore Laser Engravable Lamacoid "Lasercore" Red/ White product #602-229

Typefaces

Letter type: Whitney Semibold (Uppercase only)

Layout

1. Letter Height: 38 mm (1.5")

Mounting

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Signs to be located on the latching side of the door.

Position

- 76 mm (3") from inside edge of door jamb
- Centre line 1350 mm (53") above finished floor.

N8h

Keep Fire Door Closed Sign

Definition and Intent

Information signs are used to communicate notices or instructions in word and/or with symbols.

Design Specification

Materials

- Encore Laser Engravable Lamacoid
"Lasercore" Red/ White product
#602-229

Typeface

Letter type: Whitney Semibold
(Centered)

Layout

1. 90° corner
2. Letter Height: 16 mm (5/8")
3. 12.7 mm (1/2") between lines
(visually balanced)

Mounting

Wall-mounted with Scapa® high tack double-sided adhesive.

Locations

Variable depending on requirements.

Position

Variable depending on requirements.

N8i

Perpendicular Fire Extinguisher Sign

Definition and Intent

These perpendicular-mounted signs provide advance notification of Fire Extinguishers. They are designed to be viewed from a distance, typically down a corridor where Fire Extinguishers cannot be seen.

This sign must be provided at all Fire Extinguisher locations where they cannot be seen from a distance.

Design Specification

Materials

- Red Sintra® 3 mm (1/8") matte finish
- White vinyl characters, double-sided
- 12 mm (1/2") double-sided 3M Scotch® Brand Foam tape #4032

Typefaces

Letter type: Whitney Semibold

Layout

- White vinyl characters/ and or graphics (graphics centered on 200 mm x 200 mm (8"x 8") portion of signage)
- Letter Height: 14 mm (9/16")

Mounting

1. Foam tape along folded edge;
2. 90 ° heat bend

Locations

Signs to be located at all Fire Extinguisher/ N8 template locations where they cannot be seen from a distance.

Position

Bottom of sign 2133 mm (84") to finish floor.

Templates

Accessibility Signage

N9

Definition and Intent

This sign shall be used to designate Areas of Refuge where these areas of safety have been provided as part of Building Code regulated life safety measures in the original building design.

Materials

- Black Sintra® 3 mm (1/8") matte finish, double-sided
- Bright White vinyl graphics
- Wall-mounted with Scapa® high tack double-sided adhesive.

Typeface

Letter type: Whitney Semibold
(Uppercase only)

1. White vinyl characters and/ or graphics centered on 200 mm x 200 mm (8" x 8") sign face.

2. Letter height: 16 mm (5/8")

- Wall-mounted with Scapa® high tack double-sided adhesive.

Signs to be located within areas designated as areas of refuge and on wall adjacent to doors leading to areas of refuge.

- On wall: Centre line 1350 mm (53")
above finished floor

N10a

Assistive Listening Device Signage Text Telephone

Definition and Intent

Assistive Listening Devices signs identify all locations where assistive listening devices are available.

Each sign should include a symbol for the corresponding assistive listening device being Identified. Where a particular listening device is not readily identifiable, the N12c sign (Symbol for Hearing Loss) shall be used.

Design Specification

Materials

- Black Sintra® 3 (1/8") matte finish, double-sided
- Bright White vinyl graphics
- Wall-mounted with 12 mm (1/2") double-sided 3M Scotch® Brand Foam tape #4032

Typeface

Letter type: Whitney Semibold (Uppercase only)

Layout

- White vinyl graphics centered on 200 mm x 200 mm (8" x 8") sign face.
- Letter height: 16 mm (5/8")

Mounting

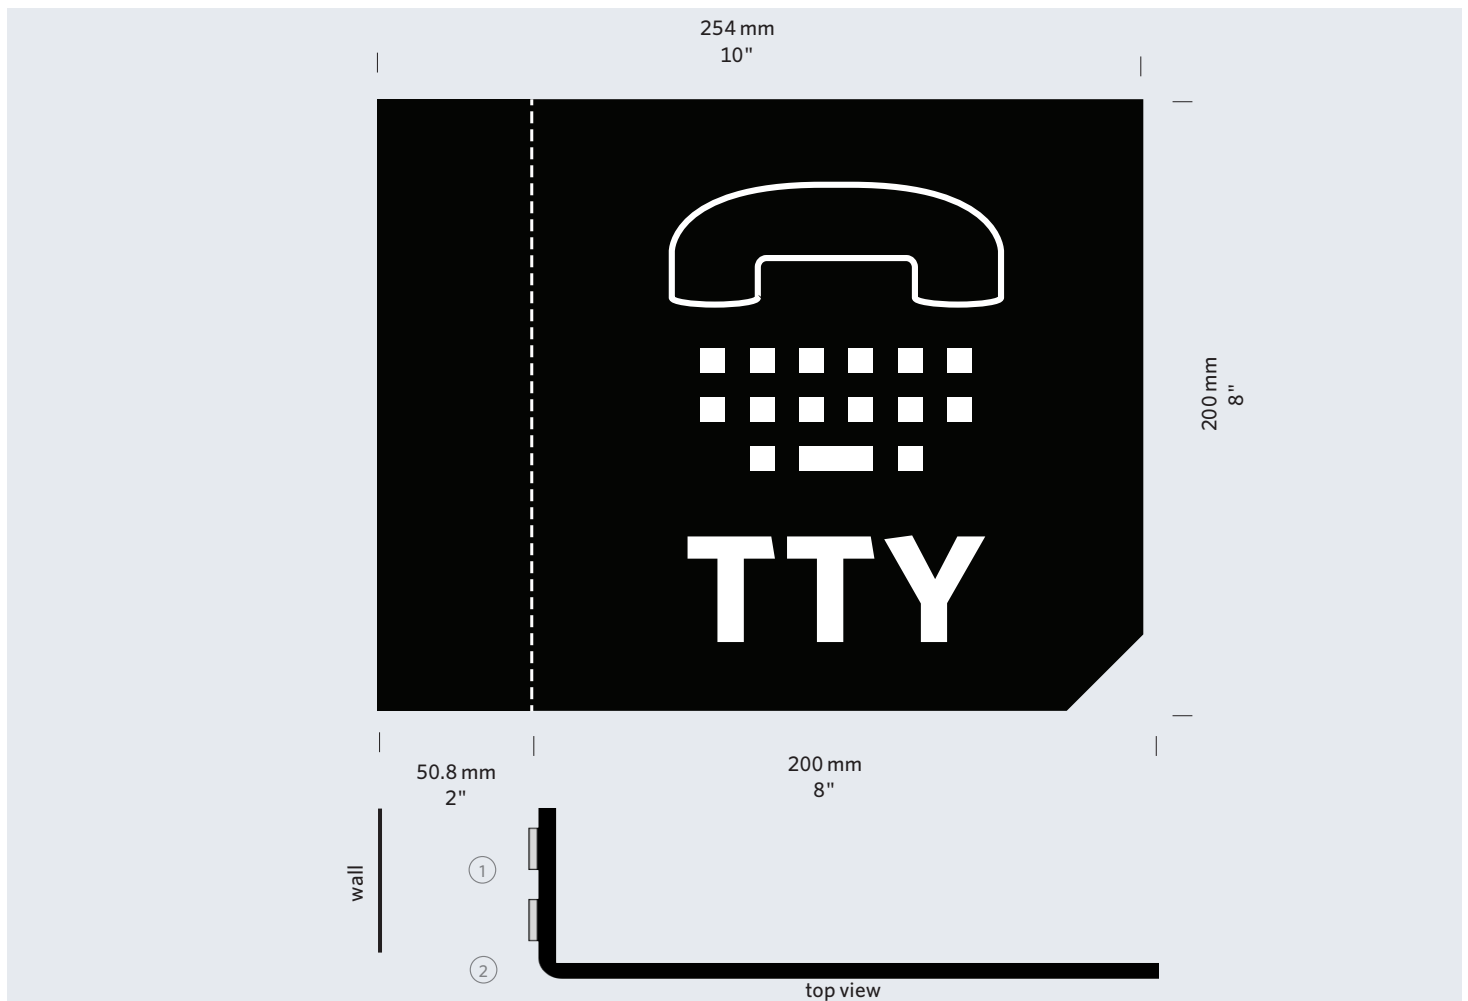

1. Foam tape along folded edge;
2. 90 ° heat bend

Locations

Signs to be located above an assistive listening device

Position

Bottom of sign 2100 mm (83") above finished floor

Templates

N10b **Volume Control Telephone**

N10c **Hearing Loss**

General Information Signage

N11a Information Signage Water Fountain

Definition and Intent
